

DIRECT DEBIT

You have just registered with the First Aid Centre of the Spijkenisse Medical Centre for a non-life threatening medical problem. It has been established that you do not have a Dutch health insurance card, an EHIC (European Health Insurance Card) or an E-111 care certificate. This means that the costs of your treatment cannot be claimed from a healthcare insurance company.

Consequently, your treatment can only be carried out after you have paid for it yourself. The triage nurse will help you with the settlement of the payment.

This Spijkenisse Medical Centre brochure provides general information about the applicable rates per specialism at the First Aid Centre of the Spijkenisse Medical Centre. These rates are in accordance with Dutch national price levels and **only** apply if your visit is not comprised of more than 1 consultation, including routine examination and/or treatment.

We point out again that, if you are unable to pay, no treatment will be carried out!
